

ETHERNET SWITCH ES 4500

Ethernet Switch ES 4500 is intended for connecting computers in Local Area Network using *100BaseTX* interfaces. Equipment operates in strong field conditions or in stationary objects (with supply voltage *27V DC*). ES 4500 is dedicated for intelligent data transmission, it is a necessary component for creating of computer network (*LAN*). Ethernet Switch processes received data and sends it only to destination users. It allows to limit to the minimum the traffic in the network.

BASIC PARAMETERS

No	Parameter	Value
1.	Power	+12 ÷ 45 V DC
2.	Power consumption	10 W
3.	Ethernet ports	6 ports 100 BaseTX 1 port 100 BaseFX (ST)
4.	Operating temperature range	(-40 ÷ +55) °C
5.	Extended temperature range	(-40 ÷ +65) °C
6.	Climatic group	N.14-UZ-II-AB
7.	Weight	3 kg
8.	Dimensions: - height - width - depth	130 mm 290 mm 290 mm
