2022-10-05, 00:39

Proceedings of SPIE, XII Conference on Reconnaissance and Electronic Warfare Systems

Tytuł

Proceedings of SPIE, XII Conference on Reconnaissance and Electronic Warfare Systems

Typ publikacji

[Monografie](#)

Rok

2019

Data dokładna

Autorzy słownie

Autorzy

ISBN/ISSN

ISBN: 9781510627857, ISBN: 9781510627864 (electronic)

Informacje dodatkowe

Published by SPIE

Powiązane publikacje

[The efficiency evaluation concept of the HF jamming based on propagation prediction model ITU-R P. 533](#)

[Application of dynamic games with incomplete information to optimisation of performance of military radio networks \(jamming avoidance\)](#)

[Verification of the criterion and measures of interferences](#)

[used in radio planning systems](#)

[Detection, direction finding and localization of selected radio emissions with swarm technology](#)

[Mechanisms of immunization of broadband radio stations for targeted interference](#)

[Optical-radio hybrid technology in military wireless communication systems](#)

[Frequency resources sharing in FH radio networks](#)

[Electronic Warfare Systems Supporting the Database of the Radio Environment Maps](#)

[The Diagnostics and Repair of Contemporary Electronic Warfare Systems](#)
